

Cornerstone IT Partners with Kaspersky Lab to Offer Premium Internet Security Coverage

MENTOR, OH – Cornerstone IT, a provider of managed IT support services for small to mid-sized businesses in Northeast Ohio, now offers Kaspersky Lab antivirus software as Cleveland's only Kaspersky managed services partner. The partnership allows Cornerstone IT to offer Kaspersky antivirus and internet security protection to its clients as a service included in their Cor-Care coverage plan rather than at an additional charge.

Kaspersky Lab internet security software provides premium protection against viruses, malware, spam and other security threats. It is one of the world's fastest antivirus software applications and uses heuristic technology for detecting unknown viruses; making the software capable of protecting against even the newest of threats.

Kaspersky Lab security solutions include universal protection for all devices including PC, MAC, smartphones and tablets.

Cor-Care is a managed IT support solution featuring multi-tiered technical support including Cor-Care Standard, Complete, Email Complete and Office Complete levels of service. Cor-Care was designed to meet varying levels of IT needs ranging from small to mid-sized networks with no or minimal IT presence, to high availability networks requiring dedicated IT support.

Included in each Cor-Care program are modified degrees of Support, Monitoring and Maintenance, and Managed Security. Kaspersky Lab internet security protection is offered as a Managed Security service provided by Cor-Care.
