

As a provider of Managed IT, Cloud and Threat Detection/Remediation, our firm takes security issues seriously.

We also recognize the importance of privacy and security.

Cornerstone IT (C-IT) is committed to addressing and reporting security issues through a coordinated and constructive approach designed to drive the greatest protection for technology users.

Reporting security issues

If you believe you have discovered a security issue, breach or other Security related item, please contact us immediately at support@CornerstoneIT.com or call **440-639-1234**

Once we have investigated the incident, C-IT will then take the following steps:

1. Coordinate with reporting organization to keep communication regarding the vulnerability confidential during the investigation stage.
2. We will investigate and verify the vulnerability.
3. We will report on the findings and provide recommendations

Coordination is key

When properly notified of legitimate issues, we will acknowledge your emailed report, assign resources to investigate the issue, and fix potential problems as quickly as possible.
